## PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 9.41) from KL University with two internships and expertise in full-stack web development, React.js, Node.js, and Machine Learning. Proven ability to build and deploy scalable web applications, integrated RESTful APIs, and deliver responsive user interfaces. Complemented by five professional certifications including Red Hat, Oracle Cloud Generative AI, and Salesforce Seeking full-time Software Development.

## EDUCATION

### B.Tech in Computer Science and Engineering

KL University, Vijayawada

2022 – 2026

CGPA: 9.41 / 10

## TECHNICAL SKILLS

|                  |                                                                              |
|------------------|------------------------------------------------------------------------------|
| Languages        | Java, JavaScript, Python, C.                                                 |
| Frontend         | React.js, HTML, CSS.                                                         |
| Backend & DB     | Node.js, MongoDB, SQL.                                                       |
| AI / ML          | Scikit-learn, Pandas, NumPy, Matplotlib, Logistic Regression, Random Forest. |
| Tools & Concepts | Git, GitHub, Data Structures & Algorithms (DSA).                             |

## PROFESSIONAL EXPERIENCE

### Full Stack Developer Intern

Research Seven Consulting Services

Dec 2025 – Apr 2026

VIJAYAWADA

- Developed and maintained modern, production-grade client-facing web applications using React.js for frontend and Node.js for backend systems.
- Integrated robust RESTful APIs and optimized CRUD operations with databases to achieve completely seamless data flow.
- Collaborated closely with senior engineers on structural UI/UX enhancements, detailed code reviews, and production bug resolutions.

### Frontend Developer Intern

Oasis Infobyte

JUNE 2024 – JULY 2024

Remote

- Built highly responsive, pixel-perfect web interfaces utilizing HTML, CSS, and JavaScript with absolute cross-browser compatibility.
- Implemented client-side form validation mechanisms that significantly reduced data input errors and improved user engagement.
- Optimized critical page load performance and systematically maintained design consistency across all independent project modules.

## PROJECTS

---

### Inkwell – Online Blogging Platform

[GitHub](#)

*React, Context API, GitHub Pages*

- Engineered a full-featured blogging platform featuring end-to-end user authentication, robust dynamic CRUD operations, and category/tag filtering.
- Implemented an intuitive draft/publish publishing workflow, custom pagination, slick toast notifications, and protected routes using React Router.

### Heart Disease Prediction System

[GitHub](#)

*Python, Scikit-learn, Pandas*

- Designed and deployed an end-to-end machine learning pipeline to analyze and predict heart disease risks by tuning Logistic Regression and Random Forest models.
- Conducted critical data preprocessing, structured feature selection, and clear model performance visualization using Matplotlib.

### Personal Developer Portfolio

[GitHub](#)

*HTML5, CSS3, JavaScript*

- Designed a high-fidelity, dark-themed responsive portfolio featuring neon accents, custom scroll animations, and a strict mobile-first viewport design

## CERTIFICATIONS

---

- Red Hat Certified Enterprise Application Developer
- Oracle Cloud Infrastructure 2024 – Generative AI Professional
- Salesforce AI Associate
- Aviatrix Multicloud Network Associate
- Automation Anywhere Certified RPA Professional
